# Simple Camera Integration

Add AI to all your existing CCTV cameras using our advanced platform.

Our plug-and-play solution immediately transforms standard surveillance cameras into intelligent safety-monitoring cameras.

### Advanced Behavioural Analytics

Not just detection, but behaviour recognition.

From assessing what a person is doing to estimating vehicle speed, our system offers advanced behaviour analysis. Benefit from near-miss alerts, fall detection, and silent alarms initiated by specific gestures.

## Smart Image Archive

Maintain a secure digital archive of all incidents and detections.

Our software generates composite images for each individual, showing their face and what they're carrying in each hand. A smart way to enhance your security archive.

## License Plate Recognition

Our system detects vehicles, digitises their licence plates, and seamlessly tracks vehicle entries and exits secure areas.

Our advanced software even captures the faces of drivers, adding an extra layer of security and accountability.

## Shift Handover Reports

Real-time alerts and comprehensive reports ensure seamless shift handovers.

Our central system collates critical events during shifts, providing an invaluable audit log for future analysis, review, and training.
